**Subject:** Re: GVP webinar

Hi Liz,

Thanks!

We did record the webinar, but unfortunately because we used our own call-in line to accommodate international participants, the audio does not seem to have been captured in the recording.

I am planning to share the Powerpoint with notes to explain some of the points that we discussed that were not explicitly written on the slides. The modeling team will also be available in the next week to field any questions from GVP members who were unable to call in today.

I'll be sending those through later this afternoon.

Best,

Brooke

Hi Brooke,

The webinar looked great this morning. We did have some trouble logging in and some of Jonna's group were not able to connect. Would it be possible to get a copy of or link to the complete webinar so that we can send to our Working Group Leads for viewing?

Thanks, LIz
